## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-4 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or obviously suggest the claimed invention.
2. Specifically, no teaching or obvious suggestion was found of the limitation "said phase plate located beyond the back-focal plane of the objective lens....; and lenses for imaging the back-focal plane of the objective lens onto said phase plate such that position and tilt of the electron beam relative to an optical axis on said back-focal plane of the objective lens and on said phase plate are made conjugate" as in claims 1 and 3. Claims 2 and 4 are allowed by virtue of their dependency.
3. Moreover, as pointed out by applicant Gerchberg fails to teach or obviously suggest the use of a combination of a phase plate and lenses to focus the back-focal plane, wherein the lenses imaging the back-focal plane such that the position and tilt of the electron beam entering and exiting the phase plate are conjugate.
4. "Complex Observation in Electron Microscopy", Danev et al, Journal of Physical Society of Japan, vol. 70, no.3, Mar. 2001, pp. 669-702 teaches

a phase plate placed beyond the back-focal plane of the objective lens (see fig. 2c-d). However, Danev et al fails to teach a lenses imaging the back-focal plane onto the phase plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
